

Rosengrens Antarctic

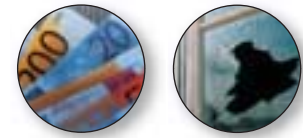

Burglary protection of valuables

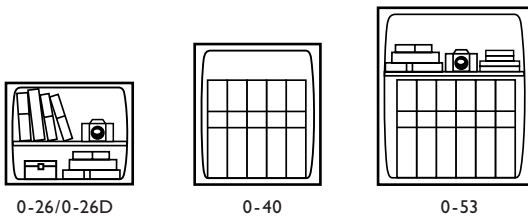

Rosengrens Antarctic is a small, compact and elegant burglary resistant cash safe in freestanding and built-in wall versions suitable for small offices, home offices and for residential use. The safes are available in 4 sizes, of which 3 of the models both as freestanding and built-in wall safes. The Antarctic range offers a wide range of interior fittings from fixed or reinforced shelves, extending shelves, lockable compartments, drawer units and a filing frame, which ensures the best use of the available space. The Antarctic range is tested and certified according to the European norm in Grade 0. The cash safes offer various lock options.

Burglary protection: Rosengrens Antarctic cash safes are tested according to the European norm EN 1143-1 in security Grade 0 and certified by ECB•S.

Locks: As standard the Antarctic range is delivered with Rosengrens resettable keylock RKL-10 which has more than 90 million key variations. Other options are available to the customers choice which include electronic lock. All models are prepared for dual locking. A deposit slot option through the door, with an anti-fishing device can be installed on request.

Design: Rosengrens Antarctic range has a functional, ergonomic and elegant design in an off-white finish. The door swings a full 90 degrees ensuring full access to the interior of the safe. All models are prepared for floor or wall anchoring.

Quality and environmental management systems: The Antarctic series are all manufactured in accordance with the ISO 9001 quality management system and the ISO 14001 environmental management system.

Quality control: The Antarctic range has been developed and continuously tested according to the Rosengrens Quality Guidelines which include several criteria relating to existing European norms with the aim of guaranteeing quality and assuring customers that the products live up to the highest expectations.
